GREETINGS

To our friends and customers, both new and old, who have stood by us for so many years (29 years, to be exact), we extend our thanks. We have enlarged our list this year to include many of the newer introductions and have dropped some real good glads to make room for the new varieties.

We buy many new introductions each year and, after growing in our trial garden, we try to select the very best as they grow for us for listing in our catalog. We make no attempt to elaborate on the description of the varieties we list. If the varieties are not good with us, we will not list them. We have bought many high-priced introductions that did not come up to our expectations, so out they go. We sincerely believe that you will be delighted to grow the bulbs you buy from us.

EXTRAS

We always give extras in count and in new varieties if our stock permits. We have reduced our prices on most items, which we believe is much better than allowing discounts.

PRICES and TERMS

Gladiolus prices are good for this spring only and good only as long as our present stocks last.

TERMS: Full remittance should accompany all orders. However, we will ship C. O. D. on request, when 25 per cent of the amount of the order is paid in advance.

SIZE OF GLADIOLUS BULBS

Large bulbs are $1\frac{1}{4}$ to 2 inches or more in diameter (No. 1 & No. 2) the best blooming size.

Medium bulbs are $\frac{3}{4}$ to $1\frac{1}{4}$ inches in diameter (No. 3 & No. 4). This size will give good bloom, but a little later than the large size.

Small bulbs are $\frac{3}{8}$ to $\frac{3}{4}$ inches in diameter.

When there is a figure before the price of a variety, as 2-15c or 3-15c, it means 2 bulbs for 15c, or 3 bulbs for 15c, etc.

Cultural directions will be sent with all orders.

DELIVERY CHARGES

We pay the delivery charges on bulbs selected from our retail list. Bulbs priced by the 100 are not prepaid.

BULBLETS

We are offering bulblets of nearly all varieties. It is a cheap way to get started in the high-priced varieties, if you will give them the extra care needed. They should be cracked or, better still, peel a strip of the hard shell from the side of the bulblet, but be careful not to injure the bulblet in peeling. Bulblets also require plenty of moisture to germinate. We do not guarantee bulblets to grow, so do not expect us to replace any which fail to germinate. We will send you the largest bulblets available, but some varieties never make large bulblets, so if you get bulblets which are small, it will be for the reason that that variety produces small bulblets. We always give extra count when stocks are available.

We cannot fill orders for bulblets after April 1st.

ORDER EARLY!

Please place your order early in order to avoid disappointment, as a great many varieties will be sold out early. It is important that orders for small sizes and bulblets be received early, as we begin planting our own stock in April and may not have the stock to fill late orders.

The cost of producing stock has increased, but we have not increased our prices. In many cases we have reduced them in order to sell out early, as we must curtail our planting this year, so it will be wise to take advantage of our prices now.

SECOND CHOICE, PLEASE!

Due to the heavy demand for bulbs this year, it is to your advantage and also to ours, if you would give a second choice, either in size or another variety.
